Canget BioTekpharma  
Ms. Sophia Song  
701 Ellicott Street  
Buffalo, NY 14203

Ms. Song,

The Roswell Park Alliance Foundation is respectfully requesting \$50,000 to support Roswell Park Comprehensive Cancer Center's development of FL118-based therapies for pancreatic cancer. Roswell Park Alliance Foundation is a 501(c)(3) designated organization that manages all donations made to Roswell Park and is ranked among the top charitable organizations for fiscal responsibility by Charity Navigator.

The funding from Canget BioTekpharma will be specifically used for the FL118 biomarker and target validation, providing important information for the upcoming clinical trials at Roswell Park Comprehensive Cancer Center.

Roswell Park has completed the major components of FL118 IND-enabling studies with FDA coordination and funding from the National Cancer Institute (NCI) and other donors. Roswell Park researchers (Multiple PI: Dr. Fengzhi Li and Dr. Christos Fountzilias, Co-I Dr. Renuka Iyer) have also submitted the R01 grant to NCI for FL118 clinical trial in advanced pancreatic ductal adenocarcinoma (PDAC) in advance of their deadline.

However, additional funding is needed to find biomarkers and targets of FL118 to use for patent selection during the clinical trials. This will increase treatment response rate and avoid unnecessary treatment, so that the clinical trials are cost-effective and high efficacy and have a high rate of response for the treated patients.

Please do not hesitate to reach out with any questions. Thank you for your thoughtful consideration of this support.
